

PERSONAL STATEMENT

I am a recent MSc graduate from the Department of Biomedical and Molecular Sciences at Queen's University. My research interests lie in studying complex human diseases using bioinformatics and data mining approaches. My current work investigates chemotherapy response in ovarian cancer patients through RNA-seq data analysis. My aim is to identify gene expression networks, miRNA networks, and genomic variants that are associated with a poor response to first-line treatment. These results will highlight underlying chemotherapy resistance pathways and can provide new targets for patient screening and pharmaceutical applications.

My practical skills include:

Programming languages	R, Python, Matlab, Linux (bash), git, Java, C
Bioinformatics	Next-generation sequencing data preprocessing and analysis, microarray data preprocessing and analysis, omics integration, bioinformatics databases, HPC environments, molecular dynamics software
Machine learning skills	Classification, clustering, pattern recognition algorithms
